And it turns out that you need to use a WebView instead of a standard activity. But if you can do that, you can also use a WebView in the activity. This is a solution I have used for a long time: public class WebActivity extends Activity { private WebView wv; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_web); wv = (WebView) findViewById(R.id.webView1); wv.getSettings().setJavaScriptEnabled(true); wv.loadUrl(""); } } And layout.xml: Multicenter analysis of safety and efficacy of percutaneous coronary intervention for left main coronary artery stenosis.
