[Edt Monoposte 2012 Crack](#)

The screenshot shows the Loopback application window. On the left is a sidebar with a 'Home' icon and a 'Devices' list containing three items: 'Combined Audio...' (FaceTime, Skype), 'Pass-thru', and 'Soundboard Rode' (Rode Podcaster, Soundboard). At the bottom of the sidebar are '+ New Virtual Device' and '-' buttons. The main area is titled 'Loopback' and 'Combined Audio Calls'. It features an 'Audio Sources' section with a table of sources and channels, a 'Mute audio sources' checkbox, and a 'Monitor audio through' dropdown set to 'Built-in Output'. Below is a 'Channel Mapping' section with 'Automatic' and 'Manual' radio buttons. A descriptive text explains that users can manually configure the virtual device by dragging channel items from the Audio Sources table to the Channel Mapping table. The Channel Mapping table shows two channels: '1 (Left)' mapped to 'FaceTime : Left' and 'FaceTime : Right', and '2 (Right)' mapped to 'Skype : Left' and 'Skype : Right'. '+' and '-' buttons are at the bottom of the table.

Sources	Channels
FaceTime	Left Right
Skype	Left Right

Channels	Audio Sources
1 (Left)	FaceTime : Left FaceTime : Right
2 (Right)	Skype : Left Skype : Right
